- Troubleshoot and debug software issues, and identify and fix performance bottlenecks.
- Implement responsive and mobile-friendly web designs using HTML, CSS, Bootstrap, and Material-UI.
- Optimize web pages for maximum speed and scalability.

PROJECT UNDERTAKEN

Major project (Quick-chat)
Link, Code

- The name Quick-chat represents the fastest, lightweight, easy-to-use application. and designed in HTML, CSS, Node JS, Express JS, and Socket.io,
- Users can create and join chat rooms, invite other users to chat, and exchange messages in real time.
- The application uses web sockets to broadcast messages to all users in a chat room, ensuring that messages are received by all participants without delay.
- This is a team project and I am a team leader also working as a front-end developer.
